BACKGROUND INFORMATION
Monsanto Company's
Delaware River Plant

Monsanto Company's Delaware River Plant is operated by the Plasticizers Division of Monsanto Industrial Chemicals Co., an operating unit of Monsanto. The plant is located on a 460-acre site 15 miles southwest of Philadelphia. The plant fronts the Delaware River and is opposite Marcus Hook, Pa. Entry to the plant is gained by way of U. S. Highway 130, approximately two miles southwest of Bridgeport, N.J.

The plant site was purchased by Monsanto in 1960 and construction was completed in late 1961.
