Arthur J. Vorwald, M.D.
Director of Research
The Saranac Laboratory
Saranac Lake, N. Y.

Dear Art:

I received your letter of May 19th along with the photograph which you returned. The x-rays have not arrived yet but I imagine will be in one of these days.

I was very glad to know that the x-ray pictures of the animals that have been exposed for a long period of time have finally revealed the same pulmonary pattern as has been seen clinically. I will be looking forward to the next letter from you on the subject.

Kindest personal regards.

Yours sincerely,

L. E. Hamlin, M. D.
Medical Director
