## Interoffice Communication

To Rosemary Shepard  
From J. J. Hall  
Date August 4, 1983  
Subject RAYNAUD's PHENOMENON

Attached is a little background information on Raynaud's Phenomenon. As you will see, I was wrong. There has been an association between Raynaud's Phenomenon and vinyl chloride. We have ordered copies of the referenced articles. It is our guess that Raynaud's Phenomenon is symptomatic of acroosteolysis and affected only PVC reactor cleaners, but we will know more when we get the articles.
