Mr. R. F. Shields
Attala Oil Company
Post Office Box 69
Kosciusko, Mississippi

George, Let me know of any word of this.

Dear Mr. Shields:

Since writing to you on March 12th, I have discussed your problem of Pydraul A-200, which you supplied to Texas Eastern, with Bill Morlock and our technical people in St. Louis. Bill Morlock indicated that Texas Eastern was experiencing some valve deposit and there certainly is no reason for us to say they are not when they indicate that they are; we admit that we have not had any extensive experience in using Pydraul A-200 as an air compressor lubricant.

In order to avoid any further difficulties, we will be glad to have you return any unused drums to the attention of D. F. Mayer, Monsanto Chemical Company, W. G. Krummrich Plant, Monsanto, Illinois, freight collect.

To facilitate this exchange, will you advise us immediately how may drums you are returning and we will send you a replacement shipment of an equivalent number of Pydraul AC.

If you need any other information, please let us know.

Sincerely yours,

W. KENNETH CONWELL
DISTRICT SALES MANAGER
ORGANIC CHEMICALS DIVISION

WKC:sg

P. S. Mr. Mayer, as soon as we receive information concerning the amount of material to be returned, we will enter a return material report. This return is authorized by D. F. Smith
