

UNITED STATES DEPARTMENT OF AGRICULTURE
AGRICULTURAL RESEARCH SERVICE
MEAT INSPECTION BRANCH
WASHINGTON 25, D. C.

YLY-

January 23, 1957

Dr. W. E. McCormick, Director
Department of Industrial
Hygiene and Toxicology
The B. F. Goodrich Company
Akron, Ohio

Dear Dr. McCormick:

This refers to your letter of January 7 concerning the list of materials appearing in the October 1956 issue of the Quarterly Bulletin of the Association of Food & Drug Officials which are acceptable to the Food and Drug Administration for certain specified food packaging purposes.

Under the proper conditions of manufacture and use, the various resins, plasticizers, stabilizers, dryers, drying oils, colors and release agents and antioxidants listed in Dr. Lehman's article are acceptable to this Branch. The use of antimycotics, insect repellents or rodent repellents on meat food product or in packaging material for meat food product has not been permitted in federally inspected meat packing establishments. There are no materials not shown in the list which have been accepted by this Branch for use in coating materials or wrappers.

Very truly yours,

R. M. Mehurin, Chief
Chemical Control Section
