

FOR PERFECT PAINT JOBS,
DUTCH BOY NALPREP and
SASH AND TRIM

DUTCH BOY NALPREP is a surface conditioner for use as a first coat on weathered or porous stucco, concrete or masonary surfaces, where penetration of the old film is necessary to assure adequate adhesion. NALPREP assures satisfactory results, while increasing the life of the finish.

DUTCH BOY SASH AND TRIM colors, add the sparkling accents that give a home distinctive charm. These tough alkyd enamel finishes are made in a broad selection of rich lustrous colors, with a gloss that stays brilliant and fresh looking. Use these colors to provide the finishing touch on doors, shutters and trim, window boxes, fences, or if your prefer, use SASH AND TRIM in white.

NALCRETE
TROPIC TONES

N13844

0000-NLI-000020138

These two **NALCRETE** colors have been created especially for the Tropic like areas. Like all **NALCRETE** colors, they form a perfect palette for exterior home decoration. And, they will retain their beauty in spite of sun, rain or heat.

55B33—NASSAU PINK

When applied, **NALCRETE** forms a "breathing-type" film that prevents water from the outside getting in, while allowing vapor from the inside to escape, before it can lift the paint and cause cracking, blistering and peeling.

NALCRETE can be applied directly to new or unpainted concrete, stucco, brick or aggregate block. Previously painted surfaces that have weathered one year or more should first be primed with one coat of DUTCH BOY **NALPREP.**
