Quality asbestos fibre in quantity

Lake Asbestos of Quebec is an established independent source of quality asbestos fibre in quantity for world wide use. Chrysotile asbestos outperforms all other known fibrous materials when this combination of characteristics is required: High tensile strength and resistance to heat, cold, weather, moisture and abrasion. This unique combination of properties of LAQ asbestos is steadily increasing its value as an engineering material for an expanding variety of applications throughout industry.

The LAQ Black Lake plant's annual capacity of 100,000 tons of high grade fibre, backed by 42 million tons of ore reserve, is assurance of continuous supplies of this versatile, economical material for prompt delivery throughout the world.

For further information, write to Sales Department, Lake Asbestos of Quebec, Ltd., 120 Broadway, New York 5, N.Y., or to Mine Office, P.O. Box 88, Black Lake, Quebec, Canada.
