AUTOMATIC RADIATOR VALVES

Automatic Radiator Valve for Steam, No. RT-295

For any 2-pipe steam heating system of 15 lbs pressure or less. Suitable for convectors and enclosed radiators... only dial and adjustment knob are visible. Packless design. Throttling action assures very close temperature control. Minimum setting above freezing point. Control will lock at any adjustment to prevent tampering. Available in angle and globe types. Sizes 1/2 in. through 1 in. (For hot water, use Type 522-A.)

CATALOG HVG-B

Automatic Radiator Valves No. RT-285 and No. RT-286
For exposed radiators and other heating units, either steam or hot water. Self-actuated—no wiring, piping or auxiliary equipment; continuously positions valve to maintain desired temperature. Packless, non-leaking valve. Quickly installed—simply insert in place of regular radiator valve. Adjustable, with tamper-proof lock. Sizes 1/2 in. through 1 in.

CATALOG HVG-B

Robertshaw ACRAGAGE Solid-Front Gages

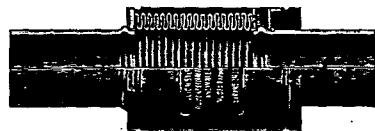

MotORIZED VALVE

For control of temperature, liquid level, etc., when used in conjunction with suitable thermostat, level switch, etc. Provides remote operation or other service requiring a medium speed valve. Control circuit only 7 or 15 volts. No separate transformer required. Service-proved, lab-tested motor is sturdily constructed, quiet in operation. All moving parts shielded from dust and dirt. Available as two-wire type for open or closed action; three-wire type for single speed floating action. Sizes 1/2 in. to 4 in. Larger sizes on special order.

BULLETIN HVG-109

PACKLESS EXPANSION JOINTS

Low Pressure Type No. 1290

For steam or hot water lines. Simple, compact means of absorbing expansion of "baseboard" radiation, finned convectors, supply lines, etc. Emergency packing feature gives extra protection and lengthens life should bellows ever leak. Comes completely assembled. Maximum traverse: 3/4 in. Maximum working pressure: 70 psig. Maximum test pressure: 90 psig. Sizes 1/2 in. through 2 in.

BULLETIN HVG-65

High Pressure Type No. 1291

For steam or water lines—vertical or horizontal. Internally guided, externally shielded stainless steel multi-ply Sylphon Bellows. Completely assembled ready for easy installation. Traverse: 2 in. (also available to give 4 in. traverse). Maximum working pressure: steam 125 psig; water 150 psig. Ends: screwed, union, flanged, welding. Sizes 1/2 in. through 6 in.

TEMPERATURE REGULATORS

Temperature
Regulators
No. RT-230
Series

Low-cost single-valve regulators that provide modulating control of heating and ventilating systems. Packless valve modulates steam flow according to dial setting on duct thermostat. Single bulb control, or with weather compensating bulb (illustrated) which automatically adjusts to prevent "drop" or to give a rising control characteristic. Self-operated. Steam pressures up to 75 psig. Temperature ranges of 60°F. between 30°F. and 170°F. Sizes 1/2 in. through 2 in.

CATALOG HVG-B

Temperature Regulator
No. RT-207 Series

For unit heaters, wall or ceiling type radiators, steam-heated duct systems. Self-powered through filled bellows thermostat system. Packless valve proportionately regulates steam supply according to load, to maintain setting on ultra-modern wall thermostat, 20°F. ranges up to 170°F. Pressures to 75 psig. Sizes 1/2 in. through 2 in.

BULLETIN HVG-E

FultraLectric Electrically Actuated

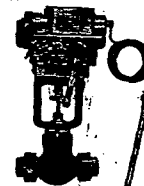

1210 Series—Temperature
1220 Series—Pressure

Basically the same features as the FultraMatic, for applications where air supply is not available and slightly slower valve action is permissible.

BULLETIN HVG-756

NOTE:

Both FultraMatic and FultraLectric are in sizes 1/2 in. to 4 in., in wide temperature and pressure ranges.

No. 1070 Series Pressure Regulators
Available in a variety of models as pressure or vacuum regulators, or relief valves, pump governors, etc. Spring adjusted type, in all-metal construction, as well as with conventional composition diaphragm, for steam, gas, air or water. Also, special versions can be used as pneumatic or hydraulic control valves. Sizes 1/2 in. through 4 in. Pressure ranges: -14 to +100 psig.

CATALOG HVG-B

No. 1003 Series Regulators

Completely self-powered, these sturdy units maintain hot water temperature by regulating flow of heating or cooling medium. Powerful, seamless Sylphon® Bellows actuates valve. Available with direct or reverse-acting valve or 3-way valve. Adjustable temperature ranges between minus 35°F. and plus 455°F. Typical of complete line of temperature regulators for industrial processes. Sizes 1/2 in. through 4 in.

CATALOG HVG-B

FultraMatic Air Actuated 1110 Series—Temperature 1120 Series—Pressure

A 3-in-1 unit (controller-positioner-valve) for precise control of temperature or pressure, at about one-half the cost of 2- and 3-unit systems. Outstanding features include improved accuracy, faster response, positive valve positioning, adjustable proportional band, simplified settings, field reversibility, easier installations.
