FOR OVER THIRTY YEARS MONSANTO HAS SERVED THE SURFACE COATING INDUSTRY

For over thirty years Monsanto has furnished the coatings industry with a wide variety of components for applications ranging from automotive finishes to exterior house paints.

Throughout this period close research teamwork between Monsanto and the paint manufacturers has given us many welcome opportunities to work with the industry on problems of material for the improvement of paint performance.

An alphabetical listing of end uses for Monsanto materials

As a useful guide to users and potential users of Monsanto products we have developed this listing of the uses known to us for our materials.

We recognize that we cannot call this list complete as there are probably more applications of our products that can be added to this list by research and technical people in the surface coating industry.

For this reason we are also giving — in a separate section in the back of this book — another index of Monsanto products arranged in alphabetical order.
