The RUBEROID Co.
QUALITY CONTROL DEPT.
SOUTH BOUND BROOK, N. J. 08880

For Attention Mr. H. Lewens - Baltimore *Date* September 24, 1965

Copy to Messrs: Dersch, Ettlinger, Neil, Lyons, Farneuf *Reference* Your letter of Sept. 22nd.

Subject MICHIGAN CENTRAL I.A.
PURCHASE & INSTALL MOODY FIBER FLUFFER - $2100.00

PLAINTIFF'S EXHIBIT GF-908

Please refer to the subject reference letter in which you indicated that you are desirous of holding up the I.A. in order to obtain more additional details concerning the installation of the Moody Fluffer with dust free operation. The latest model of the Fluffer is improved over the former model but nevertheless there is still a dust problem. We would suggest that the I.A. not be held up, that the operator be given protective equipment until local modifications be made to reduce the dust liability. The problem was attached by J.M. and others who made the recommendations for the new model.

If memory serves correctly Mr. Farneuf was to work-out some sort of hood to reduce this liability at Mobile. We would suggest that he be contacted, in the interim, for his thoughts on this matter.
