CEMENT ASBESTOS PRODUCTS COMPANY

use date you hand out —

February 18, 1975

Type your own

TO: All CAPCO Employees

Jim Carpenter - for Raylan
Fred Bickel - for VB

FROM: ?

As you know, we are making progress on dust control in our plant by engineering improvements and dust collecting equipment. We have been able to keep our asbestos dust count within the federal guidelines and are making every effort to better our experience.

In conjunction with our policy to keep you informed of our progress in dust control, we are sending you the attached booklet so you will be more aware of the potential ill effects to your health and be better prepared to take the proper precautionary steps while working with asbestos.

Best regards,

_____
