ASBESTOS SCREENING PROGRAM

The first phase of the Medical Screening Program to identify employees with abnormalities which may be asbestos related has essentially been completed and the screening now continues in the cycle of regular physicals. To comply with reporting requirements of the various states and with those of S&F, it is necessary to identify those individuals, by name, who have been diagnosed under this program as having some changes whether or not they are symptomatic.

(Over)

*For information, since ESD Field and Design Regional may have a similar situation.

DUP 0948212

We have been unable to do this for Construction employees who are examined under the auspices of your local plant physician, rather than Louviers Medical.

Please ask your plant or locally retained physician to provide a list of the Construction Division employees in question to Dr. B.W. Culpepper, Assistant Director, Medical Division, N-11400. Response by September 20, 1982, will be appreciated and we request that you refer questions to the writer.

CONSTRUCTION DIVISION
