Subject: Dust Problems - South Plainfield

Dear Dick:

You indicated in your phone conversation that you had received Mr. Stan Fonfa's analysis of the samples made at South Plainfield and sprayed by Mr. Fonfa several weeks ago. We are anxious to see the results of his tests along with his recommendations and yours.

I realize the time is short, but I will be at the South Plainfield plant next week, either the 11th or 12th, and would like to discuss this further with Carl Setterberg. I would appreciate you forwarding this information to me if at all possible to arrive at South Plainfield by the 11th.

12/18 Carl coming in with proposal on #2.

Yours very truly,

UNITED STATES GYPSUM COMPANY
