Subject Bag Labelling

Under separate cover, I have sent you one each of the 11 bags which are in current use. It is unlikely that we would re-order bag No. 8025, SG-103-7, since we have no customer for the inventories of finished product and empty bags currently on hand. A listing of all the bags is attached. We cannot change the Sylodex bag design without W. R. Grace approval; and we should have concurrence from the sales group, Tomoe and Montello before any changes are finalized.

When we finalize on a label, we must submit it for approval to CAL-OSHA as well as OSHA; and we should advise all customers before it goes into use. I have received no static from AIA/NA members, but I would like to make them aware of our final label content. Where do we stand on the "final" wording?

John L. Myers
