PLAINTIFF'S EXHIBIT

USG-946

New buildings in Chicago keep our lines busy.

Over 1200 products in our building material lines, from paint and wallboard to plaster and roof decks, are going into Chicago's new homes, schools, factories and offices.

Take the new Illinois Bell building: into it went our RED TOP* FIRECODE* V Plaster to protect the steel framing; our AIRSON* Air Distribution System for heating and cooling; and VAUGHAN WALLS†, movable partitions which use our gypsum panels exclusively.

We're mighty busy in the continuing building of our home town but you won't get a busy signal when you call us for information on new U.S.G. lines for your building. Dial 321-5861 or write us at 101 So. Wacker Dr., Dept. C-71, Chicago, Ill. 60606.
