Cincinnati, Ohio 45202

Dear Jerry:

Subject: Complete Report Of Environment Survey For Asbestos
- Port Allegany and Tyler Plants

On October 9 and 16, 1967, we received your preliminary reports on the subject plants of the Pittsburgh Corning Corporation with a promise of a complete report to follow "including results of fiber counts on membrane filters." As yet we have not received these. I am holding up corrective action at these plants until I receive your complete reports.

It is my understanding that the medical phase of the study has been funded and is about to be implemented. Since these two plants are using Anosite exclusively, you may be able to see your way to schedule the medical phase of the asbestos study at an early date. I invite your comments on this possibility.

Sincerely,

Lee B. Grant, M.D.
