RE: Asbestos Regulations and Control

The attached letter proposes a course of action for the Chicago Gasket Plant to comply with the State of Illinois and OSHA regulations for the control of asbestos hazards.

Mr. Sheehan has reviewed this proposal and approved it. Will you please go over it and prepare to take action in your areas of responsibility. We will schedule a meeting on this sometime the week of February 21st to review and agree on specific action and responsibility for getting them done.

R. S. McGranahan
