INTER-OFFICE CORRESPONDENCE

Date February 7, 1972

To Reed Wright at Cambridge

From Ralph Burnham at Phoenix

Subject: Arizona State Industrial Commission

Dear Reed:

Confirming our telephone conversation of this date, on Friday, February 4, 1972 we received a call from Mr. Tom Hunt of the Arizona State Industrial Commission. I was not in at the time but our secretary, Jan Sloggett, took the call and advised me as follows:

Mr. Hunt wanted to know if we had dust problems in production which could be hazardous to our employees' health. He also wanted to know if we use asbestos in our manufacturing process, and indicated that he wanted to stop by and take air samples.

Jan gave no information whatsoever to Mr. Hunt. He stated that he would be out of town Monday and Tuesday, February 7 & 8, but would call me on Wednesday, the 9th.

As per your recommendation, Ray Mariani or I will make every attempt to be with him at the time he makes an inspection and will cooperate with him within reasonable limits. We will try to stress the fact that we take a number of precautions to reduce the dust hazards as much as possible, such as masks, good housekeeping, dust collectors and air samples twice annually.

Mr. Hunt did not indicate what had prompted his call or desire to sample the air. I suppose it could be any number of reasons. At any rate, please be assured we will do as you suggested and will follow up with a report to you after his visit has been made.

Sincerely,

Ralph

Ralph Burnham
