Kemron Report No. 19893

Date 8-26-80

TO: INTERNATIONAL HARVESTER COMPANY
Attn: Mr. E. L. Alpaugh
401 North Michigan Avenue
CHICAGO, IL 60611

The following results were obtained on samples received on 5-28-80
and identified as shown.

TYPE OF SAMPLE: Water

ANALYSIS REQUESTED: Asbestos fiber count

Kemron Lab No.	Your Identification Number	Name Or Sample Description	Results of Analysis
			<u>f/ml H₂O</u>
98055		H ₂ O plus surface water	51,300
98056		H ₂ O from Henry tank	24,429
98057		Sludge from Henry tank	Void
<u>Note:</u> There is no way one can distinguish asbestos fibers from other fibers by phase microscopy alone. The reported result of fiber count reflects the total fiber count regardless of the nature; that is any fibrous particle was counted.
