Subject: Vendor Performance Report For
March and April, 1968

Gentlemen:

The Vendor Quality Control & Reliability Group compiles a bi-monthly Vendor Quality Performance Report. The date for this report is obtained from our Receiving Inspection Records. Listed on this report are the vendor name, part number and name, total parts and lots received, total parts and lots rejected, and the reject tag number for each lot rejected. A blank space under either the parts rejected or lots rejected column indicates no rejections. This information is evaluated to establish a quality performance level for each vendor.

Please note that the reject tag number listed on this report corresponds with the number of the Discrepant Material Notification which you receive when an order is rejected by our Inspection Department.

We are including the portion of the current report which reflects your performance during the last two month report period. We hope that you will analyze this information and take the actions that you feel are necessary to improve your performance during future report periods.
