Phone: (314) 694-1000

August 2, 1976

Mr. Roger Wills
Westinghouse Electric Corp.
6 Gateway Center
Pittsburgh, PA 15222

Dear Roger:

In support of EIA's action on opposing EPA Regulation 307 (a), Monsanto will assist as follows:

1. We will permit Industrial Bio-Test Laboratories to testify on behalf of EIA using the data that they have developed for Monsanto. We will notify Dr. Calandra, the President of IBT, of this and ask that he give you his full cooperation. Monsanto will not furnish any witnesses nor will Dr. Calandra represent Monsanto.

2. In the area of analysis, we will furnish a critical review of existing methodology. However, we will not furnish any Monsanto personnel as expert witnesses. We should have this complete by August 6.

3. We will pull together the articles listed in the references given in the Criteria Document for PCBs prepared by ICT Nisbet, which will be available for your use. We expect to have this by August 10.

David Wood will represent Monsanto on your committee and will be available as needed.

PCB-ARCH0747218

If I can be of any help, please let me know.

Sincerely,

J. Coleman Weber
Manager
