Dear Newsletter Subscribers:

Attached is the second newsletter on PCB's. We have again tried to retain original form and wording as much as possible to avoid any misinterpretation on our part.

We have heard many favorable comments about the first newsletter. We realize that the quality and usefulness of a newsletter such as this one depends almost entirely upon what is sent in. Thank you for your contributions. We look forward to receiving any further information you have on studies you are planning or are completing.

Sincerely,

Donald I. Mount, Ph.D.
Director
