Asbestos Exposure - Formulation of Policy

A general discussion was held on the need for a policy with regard to employee exposure to insulation materials that may contain asbestos. This issue has been discussed in the past without any clear-cut decisions being reached. It was agreed that a System Policy would most likely be divided into two parts: one dealing with company owned, leased or rented facilities, and the other dealing with customer facilities. It was decided to first concentrate on the issue of Company facilities before attacking the more difficult issues associated with customer facilities. Mr. DeCapua agreed to assemble a task force of the necessary building engineering and other representatives to pursue the issue in a logical manner.

J. M. Degen
