Dr. R. C. Osthoff
General Electric Company
Transformer Division
100 Woodlawn Avenue
Pittsfield, Mass. 01201

Dear Dr. Osthoff:

It has come to our attention that the Power Transformer Group of General Electric at Pittsfield issued a notice to all of your field people that General Electric was withdrawing from all Pyranol transformer activity and made specific reference to the EPA concern about the PCB constituents in your transformer Pyranol, relative to environmental pollution.

I don't believe that I should list all that is or could be wrong with this announcement. It certainly does not represent the facts and we wonder whether you could please arrange to have it withdrawn. Thank you very much.

Very truly yours,

P. G. Benignus
Market Manager
Dielectric Fluids
