DRAFT

Dr. J. Clarence Davies
Executive Office of the President
Council on Environmental Quality
722 Jackson Place, N.W.
Washington, D.C. 20006

Dear Terry:

In response to the questions raised in your letter dated October 25 we have the following comments to offer.

Monsanto's current policy aimed at restricting sales of polychlorinated biphenyls (PCBs) to dielectric applications in capacitors and transformers is applicable worldwide as it is in the United States.

With the controls we have instituted to assure proper execution of this policy we are satisfied that sales restrictions are being enforced. The worldwide program for implementing this policy is virtually completed with a minor exception which is required to provide continuing compliance with governmental safety requirements. Sales to this exceptional application will be terminated by the end of 1972.

I hope this information is helpful in your PCB work. If I can be of further service please let me know.

Sincerely,

K. W. Easley
Director
Governmental Affairs
