MEDICAL DEPARTMENT

A REPORT OF ACTIVITIES

JANUARY 1, 1955 to JANUARY 1, 1956

SCF-ABEX-0650

ABEX- 057.500

APPOINTMENTS

Dr. Hamlin was re-appointed to the Committee on Chest Diseases of the Industrial Medical Association for 1955.

Dr. Hamlin was asked to serve on the "Health Achievement in Industry Award Committee" of the Industrial Medical Association for 1955.

Dr. Hamlin was elected to the newly formed Medical Director's Club of Chicago.

After serving the appointed term of 5 years as a member of the American Medical Association's Council on Industrial Health, Dr. Hamlin resigned from this group. The opportunity to serve for an additional term was declined largely to afford a chance for another eligible physician to participate.

TALKS AND PAPERS PRESENTED AT SCIENTIFIC MEETINGS

"Origin of Industrial Lead Hazards" - This presentation was made at a post-graduate course on Modern Considerations and Methods in handling the Lead Problem in Industry given by the Kettering Laboratory, University of Cincinnati, November 7th to 11th, 1955.

Dr. Hamlin served on a panel during a discussion of problems involving Workmen's Compensation at the Sheraton Hotel, Washington, D.C., January 23rd to 26th, 1955. This session was sponsored by the Council on Industrial Health of the American Medical Association.

An invitation to appear as principal guest speaker at a meeting on "Industry versus Cancer" sponsored by the Industrial Medical Association of Kansas City, Missouri in April, 1955 was extended to Dr. Hamlin. It was not possible to accept but Dr. Hamlin suggested that Dr. Wilhelm C. Hueper of Bethesda, Md., would be a logical choice for the assignment.
