Mr. Ted Savostano
Sunohio
1700 Gateway Blvd., S.E.
Canton, OH 44707

Dear Ted:

Enclosed is a copy of one article from Pesticide And Toxic Chemical News on the heat transfer fluid test. You can see the quote that we discussed. As I noted, technically this statement is incorrect on at least two, if not more, counts.

A similar report appeared in at least one other (possibly two) of the environmental trade press sheets. However, they were circulated before I had them photocopied.

I've asked our engineers to return the EPA publication re incineration of PCBs and other wastes that we discussed so I can send you copies of the pertinent pages.

Sincerely,

John H. Craddock
Product and Environmental
Safety Director
