Contact: Frank Simon ~~Xerox J. T. Garrett A-267-S~~

The purpose of this call was to determine the effectiveness of our recent presentation and phone calls between Mel Goodman and Jack Garrett on Therminol Air Polution in the calender line.

Quite a bit has happened in the past week. Much testing and several meetings. It looks good. Their tests have been unable to come up with any appreciable quantities of Therminol in the air. As a result of this, the entering department has taken a very strong position and both the union and their safty department has backed down. Everyone has backed down including the guy with the headaches. They will present the same data to the State Department of Health, when they show up, and they do not expect any difficulties in satisfying their health requirements.
