CALL REPORT NO. IF-16

Johnson Motors
Waukeegan, Wisconsin

Date of Call: May 25, 1970

Present for Johnson Motors: Al Hanson
Environmental Services Coord.

Present for Monsanto: R.A. Damiani
D.R. Pogue

Results:

Johnson is considering closing their cooling water trenches as one alternative to prevent pollution to Lake Michigan. They feel it would not be too expensive. Must wait until after present plant shut-down for samples from north and south diecast cooling water discharge.

Received from Hanson complete list of oils, greases and dielubes used in diecast operations. Following samples will be forwarded by suppliers (per DRP contact 6-3-70) to attention of S.E. Tucker:

Milwaukee Metalube # 25 Dielube
Mobil Oil Solv-A-Sol (Stoddards Solvent)
Mobil Oil Mobilplex EPO Grease

G.W. Smith Co. reluctant to forward samples of dielube--may require obtaining sample from Johnson Motors stock.

Johnson now paying 1-2¢ per gallon for disposal of bulk Pydraul-oil wastes by Century Oil-Kenosha, Wisconsin. Disposal rate 3-4000 gallons tank trucks per week.

Further Action Required:

1) Attn. R.A. Damiani - Follow-up on second sampling of north and south discharge effluent when Johnson resumes diecasting operation.

0001663

WATER_PCB-SD0000041571

2) S.E. Tucker - Analysis of chemicals composition of stream effluent (north and south discharge samples).

3) DRP/RAD - report results-recovery recommendations to Johnson (3rd quarter, 1970).

D.R. Pogue
