Dear Mr. Brown:

Attached is a copy of the results of the samples taken from Room 595 of 30 Rockefeller Plaza. The results indicate that none of the samples contained asbestos. We are unable to make any connection about the sources of dust from the analysis. It should be noted that: Sample #1 is from the top of the equipment rack; Sample #2 is from the ceiling insulation and; Sample #3 is from the new ceiling insulation from the rear of the room. We remain available to assist in any further investigation of this problem.

Sincerely,

Roy Deitchman
