General Manager

March 31, 1977

Monsanto Industrial Chemicals Company
800 N. Lindbergh Boulevard
St. Louis, Missouri 63166

Attention: Mr. J. A. Alley
Industry Specialist
Dielectrics

Reference: Polychlorinated Biphenyls (PCB's)

Gentlemen:

We thank you for your letter of March 24, 1977, advising of the expiration of our insurance certificate on file with Monsanto on September 1, 1977.

We will not be providing you with proof of our extension of this coverage, in view of the fact that we discontinued the use of PCB's as a dielectric fluid for use in our transformers, effective September 1976.

All remaining PCB filled transformers were shipped out of inventory some time ago, and the PCB handling and storage facilities in our manufacturing plant at Bound Brook have been cleaned and all residues removed by a contractor for disposal in the approved manner.

As you can see from the foregoing, we no longer use this material and have taken all specified measures to ensure elimination of any potential contamination of either our facilities or surroundings.

We thank you for the courtesy of your reminder, which in this instance is not pertinent to our current situation.

Very truly yours,

D. Carlton-Jones
