4. Agenda Item 3 -
VI v. EPA settlement
negotiation on an hold pending
decision to challenge the Appeals Court decision
by both O&A, I will know what the
situation is. See K&H memo.

Early decision says EPA must decide what is safe.
Strong hint is that 1X10⁻⁶ is the number.
And a safe level is determined. EPA can
select any number possible to achieve the goal.

5. Item 4 -
WV's EPA language is being debating
on both appeal decisions.

6. Agenda Item 5: Safety Settlements

a. Talker's speech - No action recommended

b. TC Executive Hocus - ~~Need recommendation from the~~

c. Copying bits - not uniformly so but doesn't always work.

What do we do on executive flow 1/2/3/4?

EFV is signed for the board meeting board on 1/2/3/4

" Execs find setting for UCVN = 1300pm.

d. Signing while loading - No action recommended

e. ~~Alarms~~ ~~monitoring~~ - No action recommended

Internal group and a position, financial concern.

① with "banned" - find it's moving away from there
toward "banned" means no flared fittings.

7. OCHSE - Out soon - rumour soup, no pre biological limits. Numbers are expected to be low.

* 8. JEL send out note on effective date of TCEP; STG says immediately.

9. HSE committee will take the Emergency Release Guideline ERPG on. Art Gellman will be in charge. He will call Becky DASS & Dean Branson.

10. EVACUATION TRIGGERS - Dow has an emer. response guideline of 1000ppm for an hour but this is not an evacuation trigger. No one else has at a trigger level.
