ATLAS POWDER COMPANY
WILMINGTON 99, DELAWARE

September 17, 1957

Mr. Elmer P. Wheeler
Assistant Director, Medical Department
Monsanto Chemical Company
St. Louis, Mo.

Dear Elmer:

After receiving copies of your letters of September 4, 1957 to Dr. Robert A. Kehoe and Julius Sendroy, Jr., I searched through all of my files for a copy of my letter of September 7, 1956 to you in relation to Pydraul 150. After I was unable to find it I then realized that the entire file on Pydraul 150 had been left with Ralph Atchley who was to prepare a final report on this material.

Neither do I have any correspondence from Sendroy. If this is recent he may have addressed it to me at Kettering laboratory and it may or may not have been forwarded to me.

If you still wish me to comment on this I shall, providing you can send me a copy of my letter of September 7, 1956 and a copy of Sendroy's request. I shall be glad to clear any of my comments through Dr. Kehoe.

Since Ralph Atchley is returning shortly or has returned to the graduate school at the U. of Cincinnati, I suggest you check with Dr. Kehoe concerning the status of the final report on Pydraul 150.

Sincerely yours,

JOSEPH F. TREON, TOXICOLOGIST
CHEMICAL RESEARCH DEPARTMENT
