Philip E. Robinson

Executive Vice President

October 26, 1973

MEMO TO: J. F. Smith

SUBJECT: Lead Conference - Wash. D.C. -
Nov. 12-13, 1973

Don Lynam took my letter and sent it to Dr. McCabe, the pediatric lead expert for ILZRO.

Don and I discussed this meeting and agree with Worden and Callaghan that LIA should reply positively to the Committee's request for participation. Certainly, much of the program content is devoted to subjects in which LIA is interested and about which it is well informed.

Jerry Cole and I will be in London on these dates, and so I have asked Don to act as the "coordinator" for this venture. He will be in touch on your return.

I think there is real potential in the last paragraph of Callaghan's note. In fact, almost to a man, everyone who heard Jim's presentation at the staff meetings has expressed real interest in the idea.
