Attached are HB-40, Biphenyl, Liquid Aroclor and Solid Aroclor container specifications. Estimated container requirements for 1971 are given, along with photographs of 9 of the containers. The above products are packaged in 16 different containers, ranging from paper bags to steel drums. Bags of 4 different physical dimensions are used. These dimensions are given on the specification sheets.

Table I shows the estimated 1971 container requirements, Monsanto code number and what is packaged in each container. Part of this data was obtained directly from TSD Job No. 370-720 Report #1 and part was calculated based on present usage expanded to meet 1971 requirements.

Table II refers to the attached container photographs and gives a brief description of each container pictured, along with the code number. There is not a photograph of every container because several of them differ only in the types of inner lining used or in the case of Biphenyl bags, the printing on the bags is different.

TABLE I

ESTIMATED CONTAINER USAGE FOR 1971

Quantity	Container	Code Number
275	5 Gallon HB-40 cans	2-09-151.03-310-94052
3400	5 Gallon Aroclor cans (1)	-94053
1000	40 Gallon galvanized Aroclor drums (2)	-93002
2000	47 Gallon Biphenyl Drums	-93017
15,000	47 Gallon Montar drums (3)	1/3 02-09-826.08-618 2/3 02-09-826.17-618
5,000	55 Gallon HB-40 Aroclor drums (4)	2-09-151.03-310-93003
30,000	55 Gallon lacquer lined Aroclor drums (5)	-93015
3,000	41 Gallon fiber drum for Aroclor and Biphenyl (6)	-92068
1,200	51 Gallon fiber drum for Aroclor and Biphenyl (7)	-92072
7,000	50# Biphenyl F bags	-90022
10,000	50# Biphenyl bags - export	-90021
1,000	50# Biphenyl bags - plain	-90022
150,000	50# Biphenyl bags - regular	-90022
95,000	50# Aroclor bags - paper	-90026
	100# Aroclor bags - paper	-90020
6,700	100# Aroclor bags - burlap	-90025

(1) Used to package Aroclors 1221, 1232, 1242, 1248, 1254, 1260, 1262, 2565, 4465, 5442

Therminols FR-0, 1, 2, 3, Inerteen PPO, Pyranol A13B3B, 1262 + 10% toluene and 1260 + 10% toluene.

(2) Aroclors 2565, 4465 and 5442.

(3) Still residue from liquid and solid stills are put in these drums.

(4) Used for 4465 and HB-40

(5) Used for all liquid Aroclors.

(6) Aroclor 1268, Montar 5 and Biphenyl are packaged in fiber containers

(7) Same as (6).
