WEEKLY HIGHLIGHTS - 3/17/83

The scheduled meeting of the environmentalist-industry negotiation task force to present a proposed consensus rule for incidental PCB's to EPA Deputy Assistant Administrator Todhunter, Monday, March 14, was cancelled at the request of environmentalist team members. Among reasons cited for cancelling the meeting was their belief that Todhunter (and Acting Administrator Hernandez) would be asked to follow Ms. Buford and resign very soon.

The meeting has tentatively been re-scheduled for March 31 but there are indications that the environmentalist prefer not to have the meeting until "the new management takes over EPA."

JHC had lunch with Office of Toxic Substances, Chemical-Regulations Branch Chief David Dull in Baltimore and each paid his own check!
