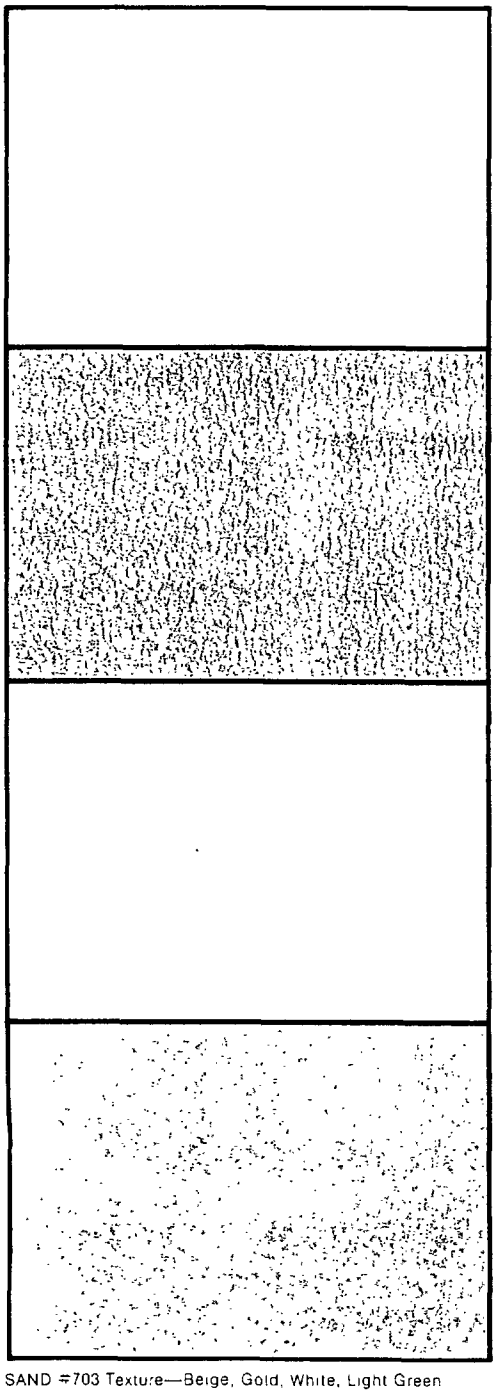
PreDec

colored textured gypsum panel



SAND #703 Texture—Beige, Gold, White, Light Green

To keep pace with today's rapidly expanding factory built and systems oriented construction market, G-P offers you a time-saving combination of non-combustible gypsum wallboard and factory applied textured finish in four colors. A gypsum panel with distinctive, evenly balanced light texture in White, Beige, Yellow and Light Green.

product description

Material:
Regular gypsum wallboard with a factory applied thermoset, water resistant, textured paint coating.

Patterns and Colors:

Colors:
White, Beige, Yellow, Light Green

Standard Sizes:
4'x 7', 4'x 7½', 4'x 8'
Special lengths available up to 14' at no extra charge.

Thickness: ¼", ½" and ⅝"

Edges: Square

maintenance

Surface may be cleaned with a sponge or cloth dampened in mild soap and water solution. Marred or scratched areas may be restored with matching touchup paint. Surface may be repainted with ordinary latex base paint.

product advantages

- Flame spread 20 U.L. label.
- Eliminates production line or job site finishing.
- Saves production hours. Just install it and forget it. Needs no painting.
- Tough, durable textured coating is impact and abrasion resistant.
- Economical initial cost and low installation costs.
- Non-combustible gypsum core adds fire protection.

product application

- Residential construction.
- Factory built mobile and modular homes.
- Ideal for movable or fixed partitions.

note:

There may be slight color variations in panels from different production runs. Take care to match panels.
