Dr. Robert S. Reimers, III
Assistant Professor
Tulane Uiniversity
1430 Tulane Avenue
New Orleans, LA 70112

Dear. Dr. Reimers,

Confirming our discussion on March 21st on your presentation to the ACS Environmental meeting in Houston the week of March 24-28th, the material was just received on Thursday March 20th. This certainly did not give us any time to critique your study and therefore we can not endorse the use of Monsanto's data. Neither can we comment on the accuracy and professionalism of your presentation and the graduate thesis of Ms. Vitters

Sincerely,

J. Coleman Weber
Manager,
Product Acceptability and
Environmental Affairs
