

Ford Motor Company

The American Road
Dearborn, Michigan 48121

January 3, 1972

Monsanto Company
500 Northland Towers
Detroit, Michigan 48235

Attention: Mr. G. Fague

Gentlemen:

Subject: Mandatory Reporting of Critical Materials
State of Michigan, Act 200, P.A. 1970

Under provisions of the subject Act, all manufacturing plants in Michigan which discharge waste water to any sewer system or to State waters must file a "Critical Materials Report" with the Water Resources Commission not later than January 1, 1972. To complete the report, each plant must determine its usage and residual disposal, via waste water discharges, of substances identified in a "Register of Critical Materials" published by the Water Resources Commission.

As a supplier of material or materials that may contain the "Critical Materials" in their formulation, you are requested to complete and return to the Buyer the attached forms, one for each item sold and shipped to a Ford operation in the State of Michigan. A form with the Ford Part Number and your address typed on it has been included for those items on which there are open blanket orders. Additional blank copies have been included for those items that are supplied to Ford as proprietary materials on spot buy basis.

Immediate action is required in order for Ford Motor Company to file on time the aforementioned report.

Sincerely,

0065229

*ST-552, Pydraul M-CS-1044

Buyer
