PLANT TELEPHONES in POWER FAILURE

To: PMSB September 16, 1981 From: SAC

There are 10 telephone circuits which operate for unrestricted outgoing use when a power failure or computer outage occurs. One of these circuits will receive incoming calls (945-4431). Currently these circuits are:

Arnold Glass	2234	(incoming 945-4431)
AN-5	2523	
Department 19	2511	
Department 50	2609	
SM	2457	
Department 44	2396	
Oxo-Esters	2284	
Department 53	2469	
Fire Department	2518	
First Aid	2300	

It is recommended that a revision of some of these lines be made as follows:

Main Gate	2343	(incoming 945-4431)
AN-5	2523	
Department 19	2511	
Department 50	2609	
SM	2457	
Department 44	2396	
Oxo-Esters	2284	
Department 53	2469	
First Aid	2300	
Department 35P	2893	

Note: Omitted are Arnold Glass, 2234 and Fire Dept, 2518

It should be noted that the Emergency Control Center has a power failure line which will receive and transmit calls. The number is [redacted]

Please make a note of this number for use when the ECC is activated.
