The East Pittsburgh Divisions recently completed surveys indicating the corporate Industrial Hygiene services needed for 1976. Each division reviewed their individual operations and the following is a list by division of the corporate Industrial Hygiene services needed in 1976:

Large Rotating Apparatus Division

1. D-3 Glass dust at grinders.
2. D-12 Resins - 5 am 11c 114-113
3. O-1 Shellac Tank, Col. 6.
4. O-1 Furnace, Col. 8.
5. O-1 Copper Welding, Col. 16.
6. O-1 Asbestos cloth, south end.
7. O-20 Degreaser, Col. 1.
8. O-20 Welding, Col. 1-6.
9. AB-21 Fumes from hot water tank.
10. AB-16 Fumes from blowing chips and coolant from poles being machined at Avey Drill.
11. AB-11 Exhaust and alkophos fumes around the coating line.
12. AB-11 Die lubricant mist from use of spray nozzles on certain blanking operations.
13. AB-16 Bracing flux fumes.
- AB-21

March 8 Bill Hunter

Plant Services Department - 3rd Quarter

Ventilation

1. Spray Painting - Sections L-14 and L-24.

DICK WOLF

Trafford Printing Division

1. Offset Pressroom - alcohol levels.
2. Casting Room - lead fumes.
3. Paint Room - use of 2525.

DICK WOLF
JOHN MILBURN.

The above are the anticipated needs of each division and in addition with the changes in the standards of asbestos, ketones, lead, noise etc., we could have additional requests for service.

Please review the above industrial hygiene requests and contact me so that we can set priorities and finalize the visit plans.
