DEALERS FOR DUTCH BOY WHITE-LEAD AND OTHER HIGH-GRADE PAINTING MATERIALS

WOULD you be interested in a paint which gives the high gloss finish and freedom from cracking and scaling that old-fashioned lead-in-oil does, and, at the same time, is ready for use?

We have such a paint. It is White-Lead and it is ~~made of~~ both absolutely pure, nothing else except the necessary pure turpentine and primer.

DUTCH BOY LIQUID LEAD is made by the manufacturers of Dutch Boy White.

The National Lead Company also makes a Pure White-Lead Paint for interior decoration. It gives the soft, velvety finish which is so desirable for interior walls and woodwork. It is extremely easy to apply, and the finish it gives can be washed when soiled without becoming streaky. This paint is called DUTCH BOY FLAT PAINT. We are distributors for it also.

Besides the added attractiveness to homes or farm buildings that a coat or two of White-Lead will give, it will often save big bills for repairs. With the present high cost of building materials this is a very desirable economy.

Pamphlets describing DUTCH BOY LIQUID LEAD and DUTCH BOY FLAT PAINT are enclosed, and we hope the next time you are in need of paint, whether the quantity be small or large, that we may be favored with your order for these products.

We also carry a complete line of high-grade colors, varnishes, brushes, stains, etc., and are always at your service if you feel that our advice on any subject pertaining to paints and painting might be helpful to you.
