Portland, Oregon 97204

Attention: Mr. V.J. Tretter, Jr.

Dear Mr. Tretter:

A letter dated November 27, 1972 was written to you requesting information about asbestos usage at the Akron, N.Y. plant. This information was never received at our office.

Due to the extremely hazardous properties of asbestos it is necessary for you to report the amount of asbestos for all processes in which it is involved.

A memorandum dated January 30, 1973 was sent to you requesting new plans for source #18. The original plans were rejected by the Dept. of Labor. The resubmission to Erie County is now long overdue.

Due to delay in receiving the above information, please submit the required material by April 1, 1973. Please call Mr. Standard at 716-846-8555 if any questions arise.

Sincerely yours,

I. Arthur Hoekstra P.E.
