

John J. Manville

JM Memo

From:

Alan Curry

To:

F. Hardenstein

Location:

Date:

2/12/76

Subject:

Proposed Quick Burst Test Method

*Attached is a marked up copy with
our comments.*

*The biggest area of concern to us
is the measuring and recording of the
various temperatures, i.e. charge water,
immersion bath, and calculation of Hoop
Stress based on temp., Also the
conditioning. With production shop
doing the routine testing it will be
difficult for them to follow all of the
procedures and doubly difficult for
Q.C. to police them.*
