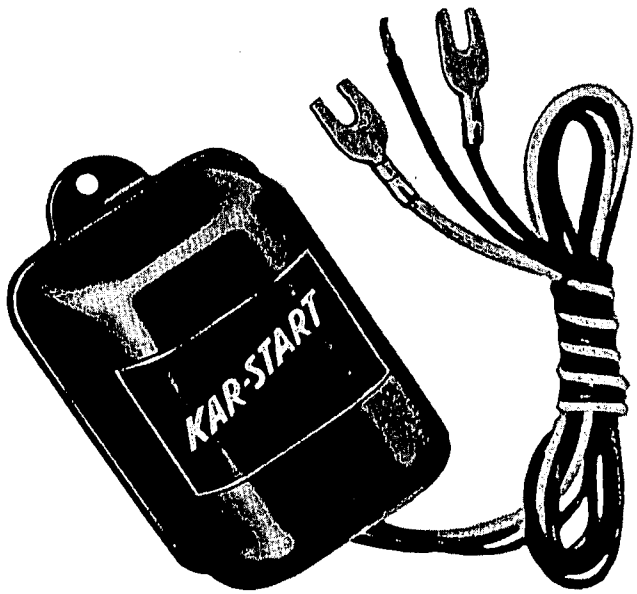
512-KAR START



3-6480

3-6480

KAR-START

START WET or COLD ENGINES FAST

- Provides fast starting to normally hard-to-start engines by sending five times the normal amount of spark from each plug at the instant the starter is activated.
- NOT a spark intensifier . . . the unit breaks up the normal single spark from the plug into a shower of hundreds of sparks.
- Can be used on all cars, trucks and boats having 6 or 12 volt electrical systems, that are equipped with coil and distributor. Not for use with diesel engines or outboards.
- Easily installed with three quick connections. Will not damage spark plugs, distributors, or any other engine components
