re: [redacted] and Trichlorobenzene Inhalation Data

Dear Dr. Kaplis:

In conjunction with your February 4, 1976 telephone conversation with Dr. G.J. Levinskas of Monsanto's Dept. of Medicine & Environmental Health, I am happy to forward to you a copy of the following information:

Treon, J.F., et al, The Toxicity of the Vapor of AROCLOR 1242 and of AROCLOR 1254, Am. J. Ind. Hyg. Assoc. Quart. 17, 204(1956).

Gage, J.C., The subacute inhalation of 109 industrial chemicals. Brit. J. Ind. Med., 1970, vol 27: 1-18.

I trust this will be of some help to you.

Sincerely,

Frederick R. Johannsen, PhD
Senior Toxicologist
