KAISER GYPSUM COMPANY, INC.

INTER-OFFICE MEMORANDUM

TO L. R. Flicker - Room #2482
AT Oakland

DATE June 11, 1965

FROM W. L. Traub
AT Pitt

COPIES TO P. J. Franklin - #2419
Oakland

SUBJECT Paint Plant Dusts

This is just a follow-up note to let you know that your earlier discussion with me regarding asbestos dusts in our Paint Plant operation were thoroughly investigated and we have now provided suitable respirator protection for employees concerned.

The type of respirator purchased is the Protex Respirator manufactured by Welsh. The model purchased is the 7406 which is Bureau of Mines approved for use with dusts and mists.

This is the same respirator we purchased for our maintenance personnel in Seattle last year prior to my transfer to Antioch. I believe it to be the best available on the market at this time and would highly recommend it to you and any of the other safety people in our companies.

If you have any further questions, please call me.
