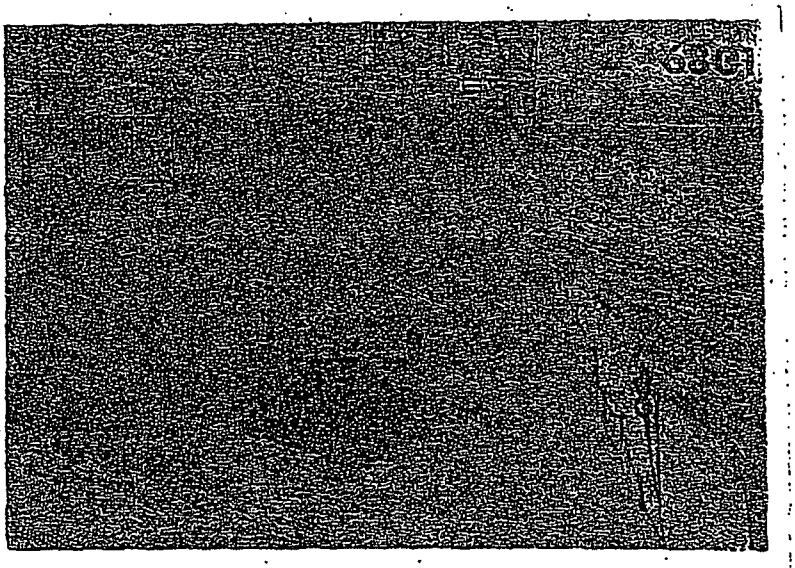
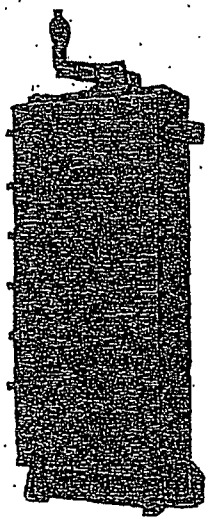
# Marine and Navy Control

Marine and Navy service requires motor control that is designed and built specifically for shipboard use. It must conserve space, yet incorporate a dependability not required of equipment installed ashore.

The bulletins in this catalog section cover Cutler-Hammer control which has been designed and standardized to meet the more common applications aboard ship. Other types to meet special service conditions and custom built controllers for specific needs can be furnished. Your nearest Cutler-Hammer sales office will be glad to consult with you and make recommendations.



WHEREVER ON THE SEVEN SEAS OUR NAVY AND MERCHANT SHIPS ARE FOUND, THERE TOO YOU WILL FIND CUTLER-HAMMER MOTOR CONTROL CONTRIBUTING TO THE PERFORMANCE OF THE FINEST FLEETS THE WORLD HAS EVER SEEN.



MANUAL DRUM CONTROLLER FOR DECK MOUNTING TO CONTROL VARIOUS AUXILIARY EQUIPMENT IN MARINE SERVICE.
