Atlantis, the ... charter line, said in a news ... conference here that it was offering the $135 rate to compete with a $210 round-trip fare announced last week by Lufthansa, a scheduled German airline.

The airline industry was thrown into turmoil last week by Lufthansa's decision renouncing the International Air Transport Association agreement on trans-Atlantic fares.

But the long-term reason for the fare dispute is a 10-year-old feud between nonscheduled and scheduled airlines. The conflict has intensified this year because the United States recession has reduced traffic growth.

There also has been a huge

A DDT-Like Liquid Studied for Hazards

By RICHARD D. LYONS
Special to The New York Times

WASHINGTON, Sept. 22 — Officials of seven Federal agencies are expressing increasing concern over the possible health hazards of a colorless, odorless liquid named PCB that some scientists hold to be even more dangerous than DDT, to which it has a close chemical resemblance.

Large amounts of PCB, perhaps tens of thousands of tons, are used annually as insulating fluids and as a means of transferring heat from one mechanism to another, such as in electrical transformers, because it has an extraordinary ability to stand up under heat. PCB, which has the consistency of molasses, can withstand temperatures of up to 1,600 de-

No. 2 Police Aide Linked to the Mulligan Case

By JUAN M. VASQUEZ

A prosecutor disclosed in State Supreme Court in Manhattan yesterday that a former chief inspector of the Police Department had been involved in the alleged corruption efforts of Hugh Mulligan, a reputed bookmaker and loanshark.

The prosecutor, Assistant District Attorney Kenneth Conboy, accused Mulligan of having "sought the intercession of a former chief inspector of the Police Department" in efforts to have a favored policeman transferred and promoted.

Mr. Conboy made the statement before Justice Miles Lane during a pretrial hearing for Mulligan, who is to go on trial tomorrow on 19 counts of criminal contempt.

Neither the identity of the former chief inspector—whose position in the police force is second only to that of the Police Commissioner—nor that

[illegible] STUDIED FOR PERIL

Continued From Page 1, Col. 7

grees Fahrenheit. It is also used in noncarbon copying paper, paints and pe[illegible]

In the last few months large amounts of PCB, or [illegible]chlorinated biphenyl, have been found in chickens, eggs, turkeys, salmon and fish meal.

This led the President's Office of Science and Technology and his Council on Environmental Quality to form a study group two weeks ago to investigate the presence of PCB in food and other compounds.

Since mid-August at least three scientific meetings have [illegible] PCB [illegible] PCB "contamination may reach levels sufficient to damage ecosystems irreversibly on a worldwide scale before the damage is recognized."

"Their entry into the marine environment should be curtailed to every practical extent, even if this requires constrictions on their production and use," the Goteborg statement added.

Wide Use of Concern

William D. Ruckelshaus, head of the Environmental Protection Agency, noted in an interview today that "it is the sudden accumulation of information about PCB that gives us concern because it is used so widely in the environment."

The agency is part of the PCB study group, which also includes representatives of the Departments of Commerce, [illegible] Administration, Dr. Charles C. Edwards [illegible] in an interview today that the study group had been convened at this agency's request "because we realized that PCB was a heck of a lot bigger problem than that of the F.D.A. alone."

James D. Grant, the deputy F.D.A. Commissioner, said, "We want PCB out of the food supply, but we don't yet regard it as an imminent hazard to health."

The chemical has been in use for 40 years. Like DDT, it resists decomposition and hence persists in the environment for years. DDT and PCB are so chemically that until several years ago it was almost impossible to detect one from the other by microchemical analysis.

Undetectable Difference

Because of this heretofore undetectable difference, much of the environmental contamination by DDT is believed to have been caused by a combination of DDT and PCB.

To date, there has been only one episode linking PCB with health hazards to humans. Three years ago in Japan five persons died and about 1,000 were afflicted with a severe skin disease named chloroacne because a rice cooking oil had been contaminated by PCB.

There have also been [illegible] tions that some pregnant women who became contaminated had babies with birth defects.

Dr. Robert Risebrough, an authority on PCB who is professor at the University of California at Berkeley, told a Senate Commerce subcommittee last month that two baby seals were stillborn and "all showed symptoms of PCB poisoning."

Yet Dr. Risebrough and other authorities have raised the possibility that PCB in itself may not be harmful to humans, but that the culprit may be a chemical byproduct named chlorinated dibenzofuran. This chemical is believed to be capable of causing birth defects to fowl, fish and perhaps rats.

Announcing An Important

AUCTION

Of Valuable Stock

PERSIAN RUGS

And Other Oriental Rugs

NOTE ABOUT THIS SALE: Due to the closing down of an agency and withdrawal of representation by the Persian Carpet exporters, they, the exporters, are forced to alter their plans and now we—by authorization of those financially concerned—have been instructed to liquidate these and other bales of valuable hand-made oriental and Persian carpets, rugs and runners which have been in storage awaiting shipment. Persian carpets of real quality in all types are becoming scarcer and more expensive all the time. Don't miss this creative uniform auction at!

HOTEL AMERICANA

7th Ave. & 52nd St., New York City

SUN. SEPT. 26th 2 P.M.

Free exhibition from 12 PM until time of sale.

Catalogs listing will be available at exhibit.

Included are the finest grade in small and large sizes: NAIN, inlaid silk QUME, antique KESHAN, KIRMAN, ISPAHAN, SAROUK, BORHARA, AFGHAN, HAMADAN, ARDEBIL, TABRIZ, HERIZ, BIDJAND, BELOUCHISTAN plus many others.

AUCTIONEER: HAROLD BRAND/Specialist in Fine Oriental Rugs/Lic. #67747
LIQUIDATOR: GLOBE TRADE EXCHANGE CO., INC.
PHONES: 212/594-4228
