MEDICAL EXAMINATIONS - EMPLOYEES EXPOSED TO ASBESTOS FIBERS

OSHA requires that all employees exposed to asbestos fibers shall have on or before January 31, 1973, and at least annually thereafter, a comprehensive medical examination of each employee engaged in occupations exposed to airborne concentrations of asbestos fibers. Such annual examinations shall include, as a minimum, a chest X-ray (posterior - anterior, 14" x 17"), a history of elicit symptomatology of respiratory disease, and pulmomary function tests to include forced vital capacity (FVC) and forced aspiratory volume at one second (FEV 1.0).

Please review these requirements with plant doctors and schedule necessary tests for compliance as soon as possible. Listed below are the names of mechanics skilled in insulation. By following a procedure currently circulating for comments these are the only employees who may be exposed to asbestos fibers.
